

GRP Cable Ladder

GRP Cat Ladder

GRP Grating & Stair Treads

The Fibretek fibreglass cable ladders are manufactured with high quality resins reinforced with glassfibre. UV inhibitors in the resin provide protection against UV.

A synthetic surface veil is incorporated for added corrosion protection.

CONSTRUCTION

The cable ladder is constructed using a 75mm x 5mm E rail and a 25mm square rung. Spacing between rungs is 300mm.

CLASS DESIGNATION

The Fibretek cable ladders conform to the internationally recognized NEMA FG1 standard, with a load capacity of 75 kg/lineal metre and maximum recommended span of 3.5 metre.

SIZE

The cable ladders are available in 3m lengths complete with splice plate utilizing stainless steel or plastic.
